Booth #1917

Flexible, Scalable, and Ready to Spray: Introducing the Flex Spray Station™

The Flex Spray Station™ from Guffey Systems sets a new standard in convenience and flexibility for your finishing process. Arriving fully assembled on locking casters, this self-contained spray booth can be rolled into place and readied for use in under half a day.

Fully Assembled and Quick Setup

- Arrives ready to roll and can be operational within half a day

Scalable for Growth

- Easily add more mobile rails, hangers, and accessories to expand your system for increased production volumes

Industrial-Grade Construction

- Constructed with durable high-quality steel and aluminum materials

For more information visit

guffeysystems.com/flexspraystation

Or contact us at: (865) 316-9633

Built for Flexibility

- Its innovative recirculating design means no ductwork is needed for water-based coatings. Solvent-based coatings require venting to the outside, so we offer easy-to-install wall/roof ventilation kits

Improve Your Dust Collector with Filter Bags

AWFS 2025 SHOW PLANNER

WOODSHOPNEWS

Noticed a loss in performance due to clogged cartridge filter pleats? Regain lost suction and capture more of the fine dust particles that are escaping into your workshop with American Fabric Filter's one-one-a-kind filter bags. Our high efficiency filters can greatly improve the performance of any collector by offering maximum air relief while still capturing dust particles as fine as 1 micron.

Anderson CNC Routers are All Aggregate Ready & Aggregate Capable

All Anderson CNC Routers come with Aggregate Capability & an Aggregate Ready Ride-Along automatic

changer included as standard. Our standard aggregate capability also delivers a compressed air blast to the inside of the aggregate retention ring to ensure a clean, precise, and reliable connection and transmission of power. Having aggregate capability on your CNC Router is an excellent way to "Future-Proof" your machine by allowing you to add additional capabilities easily and inexpensively later-on, as they become necessary. With our standard convertible table system, we deliver the ability to seamlessly change-over between pods, fixtures, and flow-through spoil boards to deliver the ultimate flexibility.

Production pocket joinery... for any shop.

TSM-30 Series features heavy duty construction throughout, with easy, top-down access for quick tooling changes. Powerful, durable induction motors drive the pocket cutting spindle and high-torque, heavy-duty air motors drive the pilot bit. Cut pockets and drill pilot holes in a single cycle. Designed for continuous, multi-shift production in a broad variety of woodworking manufacturing environments, the TSM-30 Series is available in three different voltage options. Each cuts the patented, 6 degree, low-angle Castle pocket.

Reduce cabinet assembly labor costs by 40%!

With patented technology, CSI-1.5D cuts Castle's distinctive, 6 degree, low-angle screw pocket, drills a low-angle pilot hole and inserts a flush screw - all in 1.5 seconds. In customer time tests, CSI reduced assembly time by approximately 40%. **8** Produce stackable parts in faster production times, reduce waste, and eliminate non-value-added labor in high-capacity production joinery. Use the CSI-1.5D with composites, panel and hard/soft wood. Optional SideShift Auto Positioner, Hi-Lo Plate, and Offset Work Decks.

melamine, these surfaces authentically replicate the look of natural woodgrain and stone. Engineered for durability, Syncron panels offer excellent resistance to scratches, UV exposure, and fading—with the need for additional surface treatments. Their built-in antibacterial properties also contribute to a healthier living environment.

FULL-FACE BREATHING PROTECTION SYSTEM

The SATA® air vision 5000TM is designed to protect the respiratory system, eyes, hair and skin against solvents, sanding dust and overspray. The full-face breathing protection hood consists of the supplied-air respirator, belt unit for attachment of add-on modules. There are additional optional accessories

that can also be mounted on the belt to further enhance the breathing comfort for the painter. In addition, the large field of vision and soft stream airflow enhances comfort.

Power and Efficiency with ShopBot's PRS5 Alpha ATC

The ShopBot PRS5 Alpha ATC is the affordable CNC solution that is destined to become the production power-house of your shop. With its precise movement and performance, this CNC provides full-production capabilities for a variety of cutting, drilling, and carving operations. The table is a streamlined, modular design that emphasizes stability and accessibility—with side rails level with the tool bed so materials can be loaded and unloaded easily. Made in USA.

New Products

ShopBot's Desktop MAX ATC CNC machine is available with several deck options, has a removable toolbar allowing for through cutting of long materials that extend off its 36" x 24" work bed, and comes with 7 ER-20 toolholders. The time savings from automatic tool changes, combined with the aggressive cuts possible with its 1HP electrospindle and larger bits, translates immediately to higher output and better quality from this CNC. Made in the USA.

Techno CNC's Venture Nesting Series CNC Machine

Techno CNC's NEW GENERATION "LC Series" CNC router

Techno CNC's Venture Cabinet Nesting Series CNC router is engineered for high-volume cabinet and furniture production, delivering exceptional precision and efficiency. Its robust all-steel frame ensures stability, while the 12HP HSD automatic tool changer with an 8-position rotary carousel and 9-spindle drill bank streamline complex operations. The phenolic vacuum pod table, paired with a 10HP rotary vane vacuum pump, provides superior material hold-down. Additional features like pneumatically operated dust collection hoods and material pop-up pins enhance workflow, making it an ideal solution for demanding woodworking applications.

Techno CNC's new-generation LC Series CNC routers redefine precision and efficiency for modern workshops. Built with all-steel construction and advanced ball screw technology, these machines offer exceptional rigidity and accuracy. Standard features include a 12HP automatic tool changer, eight-position tool rack, four-zone vacuum T-slot table with a 10HP rotary vane vacuum pump, and digital AC servo motors. Available in 4'x4', 4'x8' and 5'x10' sizes with a 12" gantry clearance, the LC Series combines industrial-grade performance with user-friendly controls, making it an ideal solution for high-quality, cost-effective CNC routing.

You can finance the LC Series for under \$5 an hour

VORTEX TOOL'S Series 3100XP TOOLING

The popular Series 3100XP “Xtreme Performance” tooling delivers precise cutting performance with longer tool life. This solid carbide construction, coupled with the tool’s geometry, creates a tool that runs longer, saving users’ time and money throughout the life of the tool. Series 3100XP tooling delivers three to five times more tool life than standard compression and coated compression geometry, especially with High Pressure Laminate (HPL) and melamine materials.

For more information about the Vortex XP series and their complete line of tooling contact Vortex Tool Company.

Find everything you need to build your dream wood home — all under one roof!

Meet with the industry's foremost log and timber home producers. See first-hand how various building systems are constructed.

BECOME A KNOW-IT-ALL!

Attend our **Log & Timber University** for detailed, step-by-step instructions on budgeting, planning and building your dream home.

The course is \$95 per person or \$129 per couple (plus \$30 for each additional attendee with the group). This fee covers the Course Guide, a comprehensive textbook to guide you through the entire homebuilding process; a notepad and assorted log & timber magazines; continental breakfast or snacks; plus FREE Lifetime Alumni Pass to the Log & Timber Home Shows.
