Conclusion

Introduction

Most of the people like to choose DIY woodworking projects to d é cor your home. The reason is that they are easy to make on the one side while on the other side they are fun as well. DIY stands for “ Do It Yourself ” so it means that there are such projects that you can try by yourself without taking help of anyone. This is very true and all the projects that you will learn ahead are so easy and exiting that you will love to start them right after learning them.

Woodworking projects or ideas are equally popular among each age group. The reason is that wood is such a material that increases the beauty of your home while on the other side its easy to work with it. Other materials like metals and plastic are difficult to handle and work with but wood on the other side is relatively easy to handle and work with in an amazing way. That ’ s the reason due to which beginners also find woodworking projects a fun when they start.

Due to realistic and decent look that wood gives to homes, people choose it decorate every corner of their homes. If you don ’ t have a lot of space and still you want to decorate your home with woodworking projects that you can do two things in this regard. First you need to declutter the things that you are not using since three years. The second thing that you can do is that go vertical with wood so that even in the small space you may d é cor your home in a perfect way.

Usually some people have less space in the kitchen, study area or even in patio. So they always look for such ideas that help them to decorate every single area. Some people usually don ’ t have enough space for studying. Here in the few chapter you will learn everything that how to get maximum out of your small space.

Chapter 1 – 15 Incredible Woodworking Projects To Decorate Your Indoors

In this chapter you will learn some incredible woodworking ideas to decorate your indoor. The below mentioned DIY woodworking projects will enable you to utilize your skills and make marvelous things for your indoors. If you have some idea other than these projects then still you can utilize that idea. But these projects are the basic ones that will help you to make complicated things with great ease. Let's learn these projects to decorate indoors!

Woodworking Project 01: Make white indoor sofa set:

You can make amazing white indoor sofa set for your indoor. White sofa sets are the choice of most of the people because they look simple and adorable. If you have sufficient space in your home or want to replace the existing sofa then this woodworking project to make a sofa can prove very vital for you.

To make this simple at stylish white sofa set you need few things. For instance you need to get some wooden pallets, cozy cushion, tyres, screws etc. You will also need all those materials that are otherwise required in woodworking projects to make work easier. They may include different types of saws, drill machines, nails, sandpaper, paint etc. So far this pallet white sofa set is concerned you can easily make it by putting little bit efforts.

The white pallet sofa as shown in the picture has eight seating. But you can make sofa with more or less seating as well. To make white sofa you need to gather and secure the pallets in a way as shown in picture. This design is fairly simple and the beginners can also make this one with bit ease. Next to it get the pallets to make white table for this sofa set. Join the pallets and attach the wheels as well.

When you are done with joining the pallets both for table and sofa then paint them in white and set it to dry. (You can choose any other paint color but here we are focusing on white due to this project requirement). After paint get some cozy cushions and put on the sofa. Here note that this is a white sofa therefore you need to get white covers for the cushions to give it an elegant look. When its ready place it in your living room and enjoy comfortable seating.

Woodworking Project 02: Make vintage pallet sectional sofa:

You can make this vintage pallet sectional sofa by yourself. If you have less space in your home and want to get a cool and vintage look then you can for this idea. This vintage sofa is a part of woodworking project that is easy and inexpensive as well.

To make this vintage pallet sofa you need to get some pallets. Secure the pallets to make the base of sectional sofa. We also called it L shape sofa. After making the base you need to get the mattress for your sectional sofa. The size of the mattress and sofa should be same. Here the cover of the mattress is black. After that get some cushions according to your needs and place them on the sectional sofa. Here we used some large and small cushions in different colors. You can also do it.

To make this sectional sofa we recommend you that sew the cushion covers by yourself. If you have some pieces of cloth at your home then bring them in use. In this way multicolour cushions will look more adorable for indoors. We avoided paint in this project to give more vintage look to this sofa set.

Woodworking Project 03: Join pallets and hang different things:

You can make this woodworking project to hang most of your things that are placed haphazardly in your room. Often your children are too lazy to keep the things in place. So you can make one of such pallet projects to keep the things in one place. This is simple DIY project that will look so enchanting in your room. This is also a pallet project that goes vertical in your small or even big room. You can hang your scarfs, mufflers, shoulder bags and hats over there. So keep your room tidy and go for this project. This will also decorate your walls if you go with it.

To make this you need to get 9 wooden pallets. Secure the pallets in a way as shown in the picture such as place (secure with wall of your room) three pallets horizontally at the back then join the six pallets vertically with three pallets. You can notice that the two pallets at both sides are somewhat wide while the others in the middle are not. The reason is the wide pallets can be used to hang some other large items.

After secure the pallets with nails, next you need to paint the pallets. To make them colourful and cool you can paint each pallet in different colors as shown in the picture. When the paint is properly dried then hang your different things with it to save space in your room.

Woodworking Project 04: Make pallet sofa with some storage:

You can also make a pallet sofa with some storage capacity. Often you have plenty of things in your home that you can't place anywhere. So in such cases you want to go for such woodworking projects that save space on one hand while on the other side they look highly beautiful for indoors. One of such idea is to make a multipurpose sofa. You can make storage sofa for your kid's room as shown in the picture. Your children will love to sit and study on such sofa.

To make this incredible storage sofa you need few pallets, a sofa mattress and three cushions. First join the pallets in a way as shown in the picture. Paint the pallets or not, it's entirely up to you. Next to it you need to place sofa mattress over the pallets. Use the one that covers its back side as well. Then place three cushions over it to get a comfortable sitting. Now place your extra things in the storage places that you have made. This storage sofa provides you different storage sections. So you can place your different things in different sections. Hence most of space in your room is left for other important things.

Woodworking Project 05: Project for kitchen:

While decorating other parts of your home how you can forget or ignore your kitchen. Your kitchen is an important part of your home. Hence there is also a need to decorate your home in an amazing way. There are a lot of complicated projects for your kitchen that are expensive and difficult to make. In addition some other woodworking projects are also there that can make your kitchen look so stylish and adorable. You can see one of such DIY inexpensive project in the image.

Most of the times you want to save space in your kitchen, so you often look for options that are simple and stylish. To make this woodworking project you need wooden boards. Get three wooden boards and make proper holes in them as shown in the picture then get pieces of cloth and bind it with the wood. The holes that you made in the board will help you in hanging go vertical and hand the boards with the hooks. Then place the spoons, forks and other such things in them. Hence this woodworking project for kitchen will not only help you to keep the things in an arranged way but also it will give fascinating look to your kitchen as well.

Woodworking Project 06: Make vase and other decoration pieces:

You can make a lot of amazing and unique things with woods. Wood has countless uses and the limit is skies. Besides furniture you can also make a lot of wood things to decorate your home and surroundings. There are a lot of decoration pieces that are solely made of wood. Either use pallets or logs or get some unique design by crafting the wood, you are going to get amazing decoration pieces. Place them on the table or secure them with the wall, all of them will give a fabulous look to your home.

To make this vase you need some small wood logs. Cut them in proper size. The diameter should be 2 inches while the length can also be 1.5-2.5 inches. Keep the length same. Now get some vase or use some old bucket and join the logs with it by using wood gum that will secure the small logs with it. Now place some flowers of your desire in it. This wooden vase can be placed on the side table. Moreover it's also a good idea to use it for outdoor tables.

Now check the following wall mounted design. This design is also good to go with. You can start this simplest woodworking project to decorate your home walls. Cut and arrange the wood as shown in the picture. Before mounting with the wall use a glass in the middle as shown. This woodworking project will decorate the walls of your home in really an amazing way. So why don't you try it?

Woodworking Project 07: Make indoor pallet swing chair:

After the long hectic day you want to release your stress and tension. One of the easiest thing that you can do in this regard is that make an indoor pallet swing chair for your home by yourself. This is really a great woodworking project for those who love swing. But before starting this project make sure that the roof of your home is strong enough to support this swing chair and your weight as well. If the roof is not that much strong then don't choose it for indoors rather choose it for outdoors.

To make this indoor swing chair you need to gather and secure some pallets. Paint them in white and place a cozy white mattress over it. But before placing the mattress you need to do some other things. Such as use some rope or metal chair to fasten this swing chair with the roof (or with tree in case of outdoors).

Woodworking Project 08: Make Pallet pot rack for your kitchen:

This is another simple project to decorate your kitchen and save a lot of space. One thing that is missing in this project is that the pallets are not painted. But to make this pot rack more stylish and astonishing you can paint these pallets in the same or different colors.

To make this pallet pot rack you need to gather some pallets so that and secure them in an appropriate way. Moreover don't forget to attach hooks with it so that you may fasten it with the walls using a strong chain. Again I will recommend to paint the pallets but if you want a rustic look then this project is still good to go with.

Woodworking Project 09: Make rusting pencil holders:

You can also decorate your study table by making rusting pencil holders. If you want to make something for your children by yourself then don't forget to try this project. These rusting pencil holders look fantastic when placed on the study table. Moreover it becomes convenient for your children to place and take out pencils out of these pencil holders. In addition your child will be finding to the required color by just rotating the holder. So help your child in finding the right pencil or pencil color of his choice by making this pencil holder.

This pencil holder is so easy to make as you just need a log. Get an appropriate sized log that may fit in perfectly on the study table. Moreover it should not be so heavy. The reason is that sometimes there comes a need to take it anywhere in the home, because more often children don't like studying at one place. So to make this pencil holders get a log and make some holes using drill machines. The holes should be deep enough to hold the pencils.

Woodworking Project 10: Make indoor daybed:

You can make this pallet daybed for your children. This indoor daybed can decorate your space in a very good way. This daybed is good and can be used for so many purposes. Your children can sleep and study on this bed. It can serve a lot of other functions as well.

To make this daybed you need to get a lot of equal sized pallets. These pallets are should be clean and without any damage, because otherwise they will not last longer. For daybeds you need only to make a base. Make proper base and paint in white. Then place white mattress over it. Use some pillows and cushions to give it a complete look.

Woodworking Project 11: Make indoor coffee table:

You can also make pallet coffee table for your home. Coffee tables can also add the beauty to your home. The coffee table as shown in the picture is rusted. It means that the pallets are not painted. This coffee table has storage place as well where you can place some other things such as books, magazines etc.

To make this coffee bed you need to gather and secure the pallets. Secure them in such a way as shown in the picture. Make some storage places underneath and use wheels to make this coffee table moveable. This is completely rustic and such type of wood doesn't need to be painted. The height of this coffee table is not too high. This can be placed indoors to fill your extra space. Place vase on the table and make it more stylish.

Woodworking Project 12: Make pallet sectional sofa and matching table for indoor:

You can make this pallet sectional sofa and matching table along with it. This sectional sofa is an amazing woodworking project to meet your indoor needs. This sectional sofa is so wide and cozy where your guests will love to sit. This seating arrangement is good for six people. After joining the pallets use mattresses and cushions to make them cozy.

When your sectional sofa is ready then next move to the table. The table should also have same height and width. After making the table with pallets join wheels. After that get a proper glass and place it on the top of the table. You can place lamp, magazines etc. on this. This pallet sofa set is really good to decorate your indoors.

Woodworking Project 13: Make book shelves:

There are a lot of woodworking ideas to make book shelves. You can make wooden book shelves for your home in amazing way. If you have a lot of space at your disposal then you can decide a corner where you make wooden book shelves. But if you don't have enough space then you have to decide for book shelves out of your room. There are a lot of ideas for this as well. The one idea as shown in the image is such that you would love to try. These book shelves are made under the stairs where you can sit and study for long hours. Usually such place goes in waste as you don't use this. But making wooden shelves in such a place is really a great idea. In this way you will place your books on the one side while on the other side you will be able to decorate your home in appropriate way.

To make such wooden shelves you need to get wood. For instance you can also use wooden pallets to make these shelves. Arrange woods in a way as shown in the picture and then paint them. You can also see that there is also study table in front where you can place your PC or laptop. Left to this area there are some drawers where you can place your important things. Thus this book shelves idea to decorate your home is really great and easy as well.

Woodworking Project 14: Make pallet teen girl bed:

If you want to make pallet teen girl bed then you can go for the one that is shown in the picture. The color combination is also too good that teen girls love. This teen bed is without legs. But you can construct in a way that it is above the floor/ground. This is such an amazing bed that your teen girl will love to sleep on it.

To make this bed you need some pallets of equal size. You can notice this bed is made in two pallet steps. First make the ground case using some large pallets and paint it. After that, make a small case of pallets with same technique and materials. But the upper case of the bed should be relatively small. For this purpose use pallets of small sized. After that, paint well in white. Then get the mattress in pin and place the cushions in white. This color combination and style is really adorable and your teen girl is likely to admire your efforts.

Woodworking Project 15: Make pallet wall panel:

Pallet wall panel look really amazing in homes. You can also make beautiful pallet wall panel by yourself but remember this project required a lot of patience and time as well. If you got pallets of right size then it's easy to mount them on the wall. But if some pallets are too large then you have to cut them each time before mounting them on the walls.

To make this wall panel you need to get a lot of pallets according to width and height of your wall. In this image pallets are mounted on the entire wall but you can mount them to cover half of the wall. Mounts these pallets on the wall in such a way that whole wall is covered. After mounting them you can use oil paints to make them more beautiful.

In short, these are some woodworking projects that will help you to decorate your space in an amazing way. You can try one or all of the projects to make your home more beautiful. These are some projects that can meet your indoor needs very perfectly.

Chapter 2 – 10 Woodworking Projects To Decorate Your Outdoor Space

Your backyard garden or patio is an integral part of your home so you can't avoid it. There is a need to decorate your outdoor space as well. This task can easily be accomplished if you follow the following mentioned projects. These projects are highly marvelous and you can try them with bit ease. Let's learn these woodworking projects!

Woodworking Project 01: Make outdoor pallet table:

If you just want to make an outdoor pallet table then it's also a good idea. If you have metal chairs and want to make pallet table then you can start this project. This woodworking pallet table project is very easy. All you need to get some pallets to start this project.

To make this pallet table you need to gather pallets of equal size. This outdoor pallet table has some storage place as well. So while joining the pallets make sure that you are joining them in the same way as shown in the picture. Next to it get four wheels and attach them at the bottom. In this way you will be able to move your table easily here and there in your backyard garden.

Woodworking Project 02: Outdoor pallet sitting plan:

This pallet outdoor sitting plan is going to meet your outdoor needs. Working on this woodworking project is time consuming but once you are done with it, you will get really fabulous results. This is a cozy sitting plan in white and blue combination. So for summers there is no great outdoor sitting plan than this.

To take start for this woodworking project get some pallets, nails and paint. Secure the pallets in appropriate way as revealed in the image. This set has sofa, table and a daybed. So this is a complete woodworking projects that caters your outdoor needs. After securing the pallets for daybed, table and sofa, you need to paint them. To paint the table you need white paint color for base and for top case use blue paint. After that, cover its top with glass. On the other hand use only white paint for the daybed and sofa. When paint is dried place some cozy cushions on the top and back of the sofa and enjoy comfortable sitting in your backyard.

Woodworking Project 03: Make outdoor pallet fence:

You can also make fantastic an outclass pallet fence for your backyard garden or patio. This fence is really easy then any other woodworking project and it has so many advantages as well. First of all it separates the area of your garden so it works like partition. Secondly it keeps pets and other animals out of the garden so your plants and other things remain safe. Thirdly it adds the beauty to your patio. So going with such an amazing project is highly appreciated.

To create this pallet fence you need pallets and secure them in a way as shown in the image. But you can also change them according to the needs and size of your garden.

Woodworking Project 04: Make beautiful wall garden:

If you lack with sufficient space in your backyard garden then you can make this beautiful wall garden with wood. This will not only look beautiful but also you can place different pots in it as well. Place some vegetable plants and ornamental plants to make this garden more beautiful.

To make this wall garden you need some pallets. Get some pallets in extra-large size for the back and small pallets for the pots where you will place different plants. First join the long pallets and then arrange the pots in appropriate way as shown above. Hence you will get a real wall garden within few days.

Woodworking Project 05: Make comfy daybed for outdoor:

You can easily try this comfy outdoor daybed. This daybed will meet your needs and you will love to sit there during your leisure time. The comfy daybed as shown in the picture is moveable. So when the outdoor weather is harsh you can move it easily to some safe place.

To get this you need some pallets, four wheels, mattress, and cushions. Don't paint this comfy sofa and give it a rustic look. If you are using it for summers then keep the covers in light colors while for the winters you can get the dark colors for cushions.

Woodworking Project 6: Sectional sofa and moveable table for outdoor:

If you want to decorate your outdoor space then you can go for this outdoor sectional sofa and moveable table. The paint colors and cushions are good for summer. While moveable table for outdoor is also a good choice. You can take it anywhere in your patio.

To make this sectional arrangement combine pallets in a right way. Then place multicolour cushions and on it. Besides you can also make storage places in this sectional sofa. Enjoy comfortable sitting with your family and friends on this pallet outdoor sectional sofa.

Woodworking Project 7: Make bar with stools for outdoor:

You can decorate your outdoor space area with this bar table and stools. This is also a somewhat easy project that can meet your outdoor needs. You can have fun with your friends in the evening while sitting on such an arrangement. This outdoor bar arrangement is similar to the arrangement as you see in different clubs and casinos.

First make the bar with pallets and paint it. Use blue paint color and keep the top simple. On the top you can use oil paints to protect it. Next to make stools while keeping the size of the bar in mind. Without proper measurement you will either make too big or too small tools. So get an appropriate size for both things.

Woodworking Project 8: Make pallet bench and gabion table:

This is another amazing outdoor project for your garden. With some pallets you can make this beautiful arrangement for your backyard garden or patio. When its complete you can place a vase and different other things on such table. This is highly a creative way that you can opt for your outdoor especially your children will love to find such an arrangement. This woodworking project is not that much cozy but it can decorate your patio in really an amazing way. So find a proper place in your backyard for it or else you can make such arrangement for the centre of your garden.

Woodworking Project 9: Make place for pots:

This is another rusting arrangement for your outdoor. You can try this as well to meet your backyard decorative needs. Decide about any wall of your garden and make pallet wall panel. Then mount some pot cases with the wall. Make the pot cases with the pallets in the same size as shown below.

Woodworking Project 10: Make L shaped outdoor sitting plan:

This is really amazing outdoor L-Shaped sitting plan for your patio. Like other projects get some pallets and secure them in a way that they get L shape. Then paint the sofa and use mattress and cushions to make it cozy and comfortable. You can see the table is also made with the same wood.

In short these outdoor woodworking plans will decorate your outdoor space with less efforts and money. So learn to make such projects to decorate your patio or garden area.

Conclusion

You learned a lot about DIY woodworking projects that will help you to decorate your space. You learned a lot of easy and cozy woodworking projects that will add a unique spice to your woodworking experience. After learning these projects you are able now to decorate your indoor and outdoor. As in the first chapter of this DIY book you learned several woodworking projects that will help you to decorate your kitchen, living room and drawing room. You also learned that how you can take maximum out of the small space. So in regard you learned some woodworking projects that go vertical and save a lot of your space. Such vertical projects are decorative as well. While in the succeeding chapter you found some marvelous outdoor projects that will decorate your patio space. You learned how to make mounted pallet walls, pot cases, comfy sofas, outdoor daybeds, wall gardens and a lot of other woodworking projects. So now you are highly equipped with the versatile and adorable woodworking projects that will help you to make decoration pieces and furniture as well.
