POMEROY CLOCK AND SHELF HARTFORD, CT. C. 1886

This is a clock I saw in a magazine years ago. Only two or three originals were made so I knew they were very rare. A year or so ago, I had a chance to purchase one, so I jumped at the chance. This set of plans were drawn up directly from my Pomeroy clock. Note it comes with a beautiful matching shelf.

THE JENNIFER

If you want an original, unusual antique clock here it is. The original clock was flown in from Hawaii to an auction in Boston, Massachusetts. In transit the original was destroyed. When I bought this clock it was in small pieces -- it was given to me in three large plastic sandwich bags. Most pieces were smaller than a half dollar in size. It took me two and a half weeks to figure out what went where -- talk about putting together a puzzle! I know, people at the auction where I bought the clock must have thought I was crazy!

THE IMPERIAL TOWER ENGLAND C. 1901

Here is another clock I purchased at an auction in Boston, Massachusetts. It too, is very unusual and beautiful. It measures almost four feet tall. The original was housed in a large glass case. Inside the clock I found a sign calling it "The Imperial Tower". It noted that it was made in 1901 by a sixteen year old. The original was made of maple.

THE HILARY

C. 1920

This is a rather "modern clock" ----c1920. It is an interesting clock based on a "skeleton clock" design. The original was made of brass. I modified it to be made of wood. If you want something different, this is it.

THE NASHUA

C 1890

I found this clock in Nashua, New Hampshire. It was in pieces and some pieces were actually missing. I had just enough of the pieces to figure out what was missing. It was fun bringing back something from our past that by rights, should have been taken to the dump. I think it is one of the prettiest "wall clocks" I have ever seen. The original was made of mahogany and believe it or not screwed together with large hideous brass screws. (I omitted the brass screws.)
