We are having another timed on-line auction with **Cheffins** to help streamline our Used Machinery Stock and some of our spare parts, and this time our neighbours, **Brocks Wheel & Tyre** and **Outland Group** will be joining in with some of their wheels and tyres. The auction is due to open on Thursday 24th March and **CLOSE THE FOLLOWING WEDNESDAY 30TH MARCH**. The viewing day will be on Friday 25th March from 10:00am to 4:00pm. Any other viewing times to be made by appointment. The pictures below are of some of the machines which are planned to be included in the auction, but visit the **Cheffins** online catalogue for final confirmation of machinery, spare parts, and wheel & tyre lots. We would like to thank all who supported our previous auction, and likewise all who will be viewing and bidding in this upcoming sale, and we hope any purchases are put to good use!

We are recruiting for
SERVICE ENGINEERS
at **MANNS Kent**

Making a Difference

CLAAS service engineers are key to our business, so if you'd like to be a highly valued employee working in a forward thinking dealership apply now.

- You will work on the full range of CLAAS machines, alongside complimentary products from the dealer's franchises. You will use a laptop as much as getting your hands dirty to get the job done.
- We'll offer you structured career progression, with four clear stages of development, we will support you every step of the way with ongoing training at the CLAAS Academy.

In return for your commitment to the role you can:

- You can enjoy career longevity with our continuous training programme, and we will do all we can to manage your work/life aspirations.
- And share the benefits the benefits of working for a dealer allied to a successful global brand.

Contact Thomas Hancock, After Sales Director on 07717 861826 or email a covering letter and a full CV to cuk.hr@claas.com

All enquiries are treated in the strictest confidence. Deadline for completed applications is 18th March 2022.

MANNS

HORSCH

STEWART

CLAAS

WE ARE HIRING...

AGRICULTURAL ENGINEERS

ALBOURNE, ASHFORD, DARTFORD & RINGMER

**BE PART OF THE UK'S LARGEST GROUND CARE, AGRICULTURAL
AND CONSTRUCTION MACHINERY DEALERSHIP**

Reporting directly to the Branch Service Manager, you will be responsible for repairing and maintaining a variety of agricultural and other machinery sold by the business. You will be working with premium brands such as Case IH, Lemken, KRM, Dalbo and many more.

In return, we offer excellent rates of pay, overtime and bonus scheme, a fully kitted van, laptop, phone, training and professional development, work place pension, death in service benefit, 32 days holiday (inc bank holidays), career progression opportunities and the stability of working for an established family business that has been trading for over 120 years.

What are you waiting for? Come and join our team!

**Please submit your CV with a covering letter to:
Ken Smyth, General Service Manager**

Email: kensmyth@ernestdoe.com

 **ernest/DOE power**
Where you buy with confidence

With over twenty five years' experience E W McTrab provides readers with reviews and tips on the purchase of various pieces of machinery.

MORE THAN JUST A BIGGER BORE?

Honda replaced its Foreman 500 ATV with the slightly more powerful Foreman 520, many of the detail developments made to the newcomer also passing to the ever popular Fourtrax 420 range. But are these developments enough to keep Honda ahead of the pack?

> It takes longer to explain how to select reverse on the updated Honda DCT auto transmission than it does to actually swap between forward and reverse. Pulling a small red lever back at the front (inset) and then selecting a downshift for reverse or upshift for forward is all it takes, with no need to bring the ATV to a stop

If you fancy a game of spot the difference a good option would be to see if you can identify the changes between a Honda Foreman 500 and the latest Foreman 520. The Honda Foreman 520 looks pretty much the same as the previous Foreman 500, but subtle updates include new racks and larger drive shaft guards. It is only when you ride the DCT auto FA models, however, that the most important changes can be appreciated, these also having been applied to DCT transmission Fourtrax 420 models.

Honda remain the key player in the utility ATV market in the UK, typically taking over 50% of the overall market and an even more dominant 71% plus of the 300-499cc sector; its Fourtrax 420 is the key seller in the UK and Ireland. This model is offered in five variants, from entry-level foot shift manual through to a range topping dual clutch auto with independent rear suspension.

This wide Fourtrax 420 choice helps ensure Honda can pretty much tick key boxes for most end user needs. But what if the job entails routinely towing a heavy trailer? Here matters get a bit more involved, at least that is for those who adhere to the rated towing capacities. A Fourtrax 420, regardless of spec, has a listed towing capacity of 385kg, the same rating as applies to the mono-shock, rigid beam Foreman 520 models (see specification table).

In a comparison between a 420 and mono-shock 520, the key consideration here is that the latter has access to more power and torque so will tug a full load more easily in difficult going. On paper, incidentally, the power and

torque stats for the 420 and 500 were actually pretty close, the 420 developing 26.6hp at 6,250rpm and 33.4Nm of torque at 5,000 rpm, the 500 developing 27hp and just shy of 38Nm. In practice, the larger power unit in the Foreman 500 would hang on better than a Fourtrax 420 under heavy load, with greater torque available at lower engine speeds. In tough going the 500 delivers noticeably better 'grunt' than a 420.

The main reason for the engine change was not to boost power but more to enable Honda to retain similar output from an engine that will meet tough off-road vehicle emission regulations.

Getting back to towing capacity, the Foreman FA6 and FM6 variants with independent rear suspension have had their towing capacity upped to a very useful 600kg. Why these models have a higher capacity over their rigid beam alternatives has never really been clearly explained by Honda, but the IRS models do have a disc, as opposed to drum, brake rear. This may deliver the extra stopping power required to pin down a heavy trailed load. >>

SMOOTHER SHIFTS

Both Fourtrax 420 and Foreman 520 models with automatic DCT transmissions have a significant change to the control software determining how the gears are selected. Year on year, Honda have continued to develop the software of the existing DCT auto models, but with this revision there is not just a claimed improvement in shifting but the adoption of two self-selecting driving modes, comfort and sport.

In outline, comfort mode is adopted when the operator opens the throttle relatively gently, the transmission upshifting as the engine revs up to around 2,500rpm. Open the throttle wide for a brisk bit of acceleration and the transmission mapping alters accordingly, making upshifts at

around 3,500 to 4,000 rpm. We got to try a 500 and 520 auto back to back and whilst the original 500 shifted up and down the dual-range five-speed transmission pretty well, you could detect the different ratios selecting both up and down.

When the throttle was pinned wide open, the transmission in the Foreman 520 was noticeably smoother, delivering pretty much automotive levels of gear shift refinement. But at modest throttle openings the 520 felt pretty much as dim witted as its forebear, hanging on to a low ratio for longer than you would perhaps select if you were changing ratios yourself.

On the Foreman 500, and the auto Fourtrax 420 too, it is easy enough to swap to ES electronic shift mode and so take over how the gears are changed.

But you have to switch between the modes. On the 520 and latest 420 auto models, Honda have added a manual shift override in auto. To put it simply, if the automatic shift is not delivering the ratio you want, you can now simply press the up or downshift buttons to change gear for yourself.

This may seem a bit of a gimmick but in practice the system on the Foreman 520 auto we tried worked really well. Faced with a stiff incline, the ability to shift to a lower ratio ahead of the climb ensures the right gear could be selected long before transmission would work out what to do for itself.

We did not tow a trailer in our brief test run, but we would expect the ability to change gear as needed will be a real bonus for those working in tricky terrain, particularly with a heavy towed load. >>

HONDA FOURTRAX 420 OUTLINE SPECIFICATIONS (2021 MODEL YEAR)

Model	TRX420FA6	TRX420FA2	TRX420FM2	TRX420FE1	TRX420FM1
Prices (excluding VAT)	£8,225	£7,875	£7,600	£7,600	£7,000
Engine	420cc liquid-cooled OHV wet-sump longitudinally mounted single-cylinder four-stroke				
Bore x Stroke	86.5mm x 71.5mm				
Driveline	F/R driveshaft w/ TraxLok® and torque-sensing front differential				
Transmission	Automatic Dual Clutch Transmission; 5-speed	Automatic Dual Clutch Transmission; 5-speed	Manual foot-shift; 5-speed + Reverse	ESP push-button; 5-speed + Reverse	Manual foot-shift; 5-speed + Reverse
Power steering	Yes	Yes	Yes	No	No
Suspension front	Independent double-wishbone. 185mm travel	Independent double-wishbone. 170mm travel			
Suspension rear	Independent. 215mm travel	Mono- shock. 170mm travel			
Brakes front	Dual hydraulic calipers 190mm discs				
Brakes rear	Single hydraulic caliper 170mm disc	Single 160mm sealed mechanical drum			
Tyres	Front 24 x 8-12 Rear 24 x 10-11				
Dimensions LxWxH	2150x1200x1190mm	2100x1200x1170mm			
Seat height	890mm	860mm			
Ground clearance	230mm	180mm			
Wheelbase	1295mm	1270mm			
Turning radius	3.50m	2.80m			
Towing capacity	385kg				
Rack capacities	Front 30kg Rear 60kg				
Fuel capacity	14.9 litres (inc. 4.9 litres reserve)				
Guide weight	307kg	292kg	281kg	279kg	279kg

> Old style 420 and 500 models have a short drive guard (left), new 520 and 2020 model year 420 models having a longer guard plus a revised CV gaiter material

> New racks are flatter, stronger and designed to accommodate Honda Pro Connect accessories. Sealed front cubby has a 1.9 litre capacity

<< The override, which works for both up and down shifts, operates when the shift buttons are pressed but once a 'manual' ratio shift has been made, the transmission reverts back to auto. This means you can shift up and down when you think you can do a better job than the ATV but still leave the transmission to sort itself out for the rest of the time.

EASY REVERSE

If you opt for an automatic or push button ES electro shift transmission on the 420 and 520 models out goes the need to stop, select neutral and pull back the parking brake lever and reverse lock before pressing the downshift button to select reverse. You can change down and, without rolling to a stop, pull back a red lever on the front of the left bar whilst downshifting to select reverse.

The latter will engage at speeds below 3mph,

> Entry-level Fourtrax 420 models saw the least change for the 2020 model year, with just new racks and improved shaft guards and gaiters. Variants with the DCT transmission, however, benefit from the same DCT auto upgrades as fitted to the new style Foreman 520

HONDA FOREMAN 520 OUTLINE SPECIFICATIONS (2021 MODEL YEAR)

Model	TRX520FE2	TRX520FM2	TRX520FA6	TRX520FM6
Prices (excluding VAT)	£8,925	£8,500	£9,300	£8,925
Engine	518cc liquid-cooled longitudinally mounted single-cylinder four-stroke			
Bore x Stroke	96.0mm x 71.5mm			
Driveline	Direct front and rear driveshafts w/ TraxLok® and locking front differential			
Transmission	Manual ESP push-button; 5-speed + Reverse	Manual foot-shift; 5-speed + Reverse	Automatic Dual Clutch Transmission; 5-speed + Reverse and High/Low	Manual foot-shift; 5-speed + Reverse
Power steering	Yes	Yes	Yes	Yes
Suspension front	Independent double-wishbone. 185mm travel		Independent double-wishbone. 185mm travel	
Suspension rear	Mono- shock. 185 mm travel		Independent. 215mm travel	
Brakes front	Dual hydraulic calipers 190mm discs			
Brakes rear	Single sealed 160mm mechanical drum		Single hydraulic caliper 170mm disc	
Tyres	Front 25 x 8-12 Rear 25 x 10-12			
Dimensions LxWxH	2100x1200x1220mm		2150x1200x1230mm	
Seat height	870mm		910mm	
Ground clearance	190mm		240mm	
Wheelbase	1270mm		1290mm	1290mm
Turning radius	3.20m		3.50m	
Towing capacity	385kg		600kg	
Rack capacities	Front 40kg Rear 80kg		Front 45kg Rear 85kg	
Fuel capacity	14.7 litres (inc 5.9 litres reserve)		14.7 litres (inc 4.9litres reserve)	
Guide weight	289kg	294kg	331kg	318kg

allowing you to shuttle back without coming to a complete stop first. To select forward you only need to press the upshift once for neutral and again for first gear. It works quickly and easily and should prove a real plus when trying to chase errant stock or for yard work.

As to the other changes, all models get racks that are a bit bigger, flatter and claimed to be stronger but carrying capacities remain as before (see specifications). Up front, a water sealed 1.9 litre box comes as standard, its diminutive capacity proving useful for small items with the usual caveat that you can only gain access if there is nothing carried or fitted onto the rack. The racks are also designed to take Honda Pro connect accessories.

On the ATVs underside, guarding to the drive shafts is improved, with the CV gaiters changing to a softer compound less liable to crack over time. As to lighting, the Foreman 520 has a 50w headlight in place of the 45w unit fitted to the previous 500. There are a few tweaks to the front bull bar too.

Revised model pricing starts from £7,000 for the entry-level for the TRX 420FM1 manual ATV with mono-shock rear suspension, the automatic TRX520 FA6 with independent rear suspension retailing for £8,925 (all prices ex-VAT). As standard, all models come with Datatool tracking with GPS technology that offers theft protection, instant notifications and full journey history logging. The system carries a subscription of £9.95 per month or £109 for a year (incl VAT), but unlike a tag system offers real time tracking. This should help make it easier to recover a stolen ATV.

SUMMARY

If you are after an entry level manual Fourtrax 420, the changes twist existing and new models are worth having but not a game changer. If you can get an 'old' model, with an offer price then you will be unlikely to think you have made the wrong decision.

If you are looking at a fully specified auto Fourtrax 420 or new auto Foreman 520 it is different. Smoother shifting is nice to have, transmission override should prove really handy and eased reverse selection makes the older system seem archaic. It is the small changes that can make a big difference to those spending a long time on an ATV saddle.

> Honda has replaced the previous Foreman 500 with a revised model, the Foreman 520. Apart from an engine capacity hike from 475cc to 518cc, the new model has a number of developments that include heavier duty racks, improved guards for the driveshafts and a more powerful headlight. It is the automatic DCT models, however, that see the greatest change with revised shift mapping for smoother gear changes and electronically engaged reverse that is much easier to use

WHAT'S NEW

VERSATILITY, PERFORMANCE AND TECHNOLOGY

34

The high power and technology of McCormick tractors will be highlighted at the main agricultural machinery exhibitions scheduled to take place in Europe in the early months of 2022.

X6.4 P6 DRIVE

The main highlight at McCormick is the new X6.4 P6 Drive Stage V range, designed and built for those looking to find versatility, performance and comfort in a single tractor; an ideal and irreplaceable companion for open-field and multi-utility operations, hay harvesting, and operations that require a loader.

Stage V compliant, thanks to the exhaust gas post-treatment system, the range features three models X6.413, X6.414 and X6.415, powered by 4.5-litre, 16-valve, 4-cylinder FPT NEF 45 engines with a maximum power output of 155hp. The powertrain and transmission layout allows for a wheelbase of 2,560mm, providing great stability, and at the same time versatility and manoeuvrability.

The P6-Drive transmission with six Power Shift gears and four ranges offers 24 + 24 ratios, which rise to 40 + 40 when a creeper is fitted. Power output is enhanced by the 4-speed PTO.

The front hitch can lift up to 2,500kg and the electronic rear lifting system up to 7,200kg.

The maximum rear wheel size is 650/60R38 and maximum allowed weight is as high as 9,500kg.

The closed-centre hydraulic system features a 123 l/min pump capable of handling up to seven spool valves.

Design, ergonomics, comfort and technology applied to improving working conditions are the other features that make X6.4 P6-Drive the ideal partner in the field and on your farm.

A distinctive feature of the McCormick High Visibility cab is its FOPS-homologated panoramic roof and the hatch for natural ventilation, which enhance the tractor's performance when using the M40 front loader for bales handling. Also worth mentioning are the LED headlights. Up to 14 headlights are available, eight of which are incorporated in the roof to provide excellent night vision.

The cab sports a mechanical suspension that, combined with the suspended front axle with independent arms further improves driving comfort.

The cab is designed with high quality automotive-derived materials. The same attention to design and functionality is found in the control instrumentation with its fully ergonomic design, a 12-inch touch screen monitor and all-in-one multifunction joystick.

X6.4 P6-Drive features the PSM (Precision Steering Management) system to control and manage satellite guidance. This state-of-the-art technology integrates with the ISOBUS implement control system and the McCormick Fleet & Remote Diagnostic Management

system, which significantly reduces operating costs while enhancing efficiency and profitability.

MCCORMICK X7 SHORT WHEELBASE

After its successful introduction at Eima 2021, the McCormick X7 SWB (Short Wheelbase) is stage V compliant thanks to the HI-eSCR2 (DOC+SCRoF) exhaust gas treatment system. The tractors in the range are fitted with the new FPT NEF 45, 16-valve, 4.5-litre 4-cylinder engines and FPT NEF 67, 24 valve, 6.7 litre, 6 cylinder engines with Turbo Intercooler and Common Rail electronic injection. McCormick's X7.618 VT-Drive, which can deliver up to 175hp thanks to the Power Plus system, and the X7.618 P6-Drive, also sporting a 175hp 6-cylinder engine, will represent the new product family.

The continuously variable, 4-stage VT-Drive transmission with four sets of crown wheels and oil-cooled clutches guarantees first-class responsiveness. Speeds range from 0.04 km/h to 50 km/h. The transmission is controlled by the EasyPilot joystick, located on the multifunctional

armrest for improved ergonomics.

The P6-Drive transmission features six Powershift gears under load, five robotised ranges and electro-hydraulic reverse shuttle on the steering wheel. In total, gears are 30 Forward + 15 Reverse which become, with the Creeper, 54 Forward + 27 Reverse. The Stop & Action system integrates the De-Clutch into the brake pedal, allowing the tractor to be stopped without depressing the clutch for easier driving on the road. Simultaneous use of the Stop & Action and APS (Auto Powershift) systems allows the P6-Drive transmission to be driven in a similar way to VT-Drive.

MCCORMICK X7.6 VT DRIVE STAGE V AND X7.6 P6-DRIVE STAGE V

McCormick X7.6 provides a mix of technology, reliability and power to effectively meet the demands of farm and field work.

The range features Beta Power Fuel Efficiency 6 cylinder, 24 valve engines with turbocharger and Common Rail injection with power outputs up to 240hp. The innovative HI- eSCR2 system ensures that the engines are Stage V compliant.

Two transmission versions are available: P6-Drive with six powershift gears for five ranges, robotised range shifting and electro-hydraulic reverse shuttle on the steering wheel, available in the manual or automatic versions, and the continuously variable VT-Drive transmission, which offers guaranteed excellent response and great user-friendliness thanks to the adoption of the "Power Zero" system, an automatic mechanism that keeps the tractor stationary and blocks all movement once the reverse shuttle has been engaged. The system paves the way for yet another new feature on the McCormick X7.6 VT-Drive, namely the electronically controlled smart-brake.

The transition from road to field is now more efficient and effective thanks to the newly introduced EasyGrip central tyre inflation system, which can be conveniently operated from the Data Screen Manager. The system controls pressure and stops automatically when the pre-set level is reached, reducing soil compaction, fuel consumption, tyre wear and optimising soil productivity.

MCCORMICK X8 VT-DRIVE STANDS OUT WITH ITS NEW COMFORT LINES

The X8 VT-Drive is available in three models with powers of 264hp, 286hp and 310hp delivered by 6-cylinder Betapower Fuel Efficiency 6.7-litre engines equipped with eVGT electronically controlled variable geometry turbocharger and SCR exhaust gas post-treatment system, fully compliant with Stage V regulations. Its strength lies in the continuously variable transmission with four stages, 40 kmh ECO speed at 1,300 rpm and 50km/h ECO speed at 1,600 rpm.

The Première Cab, thanks to its four pillar design,

offers panoramic visibility in every direction. The operator's seat has dynamic air suspension with automatic height adjustment and a backrest with both heating and ventilation. The right armrest houses all the main controls and the EasyPilot multifunction joystick has an ergonomic grip and clear functions.

In addition, X8 VT-Drive Stage V is guidance ready and features McCormick's Fleet & Remote Diagnostic Management system to monitor key tractor fleet activities at anytime, anywhere in the world. Using IoT (Internet of Things) protocols, all information on fleet activity such as geolocation, consumption, levels, temperatures and work sessions are made available via PC or mobile device. This allows the operational status of tractors to be monitored and their efficiency to be kept constantly under control.

MCCORMICK X5 STAGE V

McCormick X5 Stage V offers three models, X5.100, X5.110 and X5.120 with power outputs ranging from 95hp to 114hp. They are available in Premium and Efficient versions. The new High Clearance version, particularly suitable for horticulture, comes in two models, both in the Efficient version, namely the 95hp X5.100HC and the 102hp X5.110HC.

Transmissions range from 48+16 with hydraulic reverse shuttle and HI-Medium-Low (Premium) to 12+12 or 24+24 with mechanical or hydraulic reverse shuttle (Efficient and HC).

The hydraulic system provides 62 l/min for utilities in the Efficient and HC versions and up to 82 l/min in the Premium version.

The maximum capacity of the rear lifting equipment is 3900kg (HC) and 4500kg with additional cylinders for the standard versions.

McCormick X5 sports the suspended cab option, which can be combined with the suspended front axle in the Premium versions, for guaranteed excellent operator comfort through every stage of operations (open field, front loader and transport) and outstanding grip on the ground.

The 75hp 3.4 litre, 4 cylinder and 8 valve FPT Turbo intercooler engine with Common Rail electronic injection guarantees excellent response and high elasticity, enhanced by a torque of 375 Nm at 1,400 rpm, values normally associated with 100hp tractors.

Its power and agility are also enhanced by the

category 2 mechanically-controlled rear lifting system with a capacity of 3,900kg, which is precise and easy to use thanks to the ELS system (ergonomic lift system). A 1,700kg category 2 front hitch is also available as a further option

The dual pump hydraulic circuit provides exceptionally efficient management of the five hydraulic spool valves (three rear and two mid-mount) and the implements thanks to a pump flanged to the engine with a dedicated flow rate of 56 l/min, while 32 litres are directed to the steering system.

MCCORMICK X4F

McCormick X4F is the new specialist tractor that combines McCormick's hallmark power and technology with versatility and lightweight for manoeuvring in tight spaces. This makes it the ideal tractor for all row-crop operations in the narrow spaces found in orchards and vineyards.

Stage V compliance is guaranteed by the innovative system that uses a passive regeneration DPF, DOC oxidation catalyst and, for models over 75 hp, SCR (selective catalyst reduction) catalytic converter and AdBlue® tank with practical quick-access and quick-top-up system.

The engine maintenance interval has been extended to 1,000 hours, significantly reducing operating costs and downtime.

McCormick X4F comes in the configuration with P3-Drive 48AV+16RM transmission with electro-hydraulic reverse shuttle and fully robotised H-M-L speed and gear shifting under load, controlled by the new-generation multifunction joystick that accommodates all controls.

X4F is characterised by its high traction capacity, as well as a comfortable ride on the road, made possible by the new cab with mechanical suspension, the suspended front axle and, last but not least, the ADS (Advanced Driving System), which can be connected to satellite-guidance and telemetry systems.

The front axle is manufactured by Argo Tractors and features a limited-slip or Hydralock. X4F is equipped with an open-centre hydraulic circuit, with a 30 l/min pump for steering and 58 l/min for utilities. A third, 36-l/min pump can also be added operating in tandem with the utility pump to achieve a total flow rate of 94 l/min, of which 55 l/min at as little as 1,500 engine rpm.

GUARANTEED SMOOTH OPERATION

The versatile Europrofi Combiline rotor loader wagons from Pöttinger have guaranteed smooth operation, high output and convenience in forage harvesting for several decades. These multi-purpose loader wagons are available with or without unloading beaters. 35 knives ensure all models chop to a theoretical length of 39mm. To meet the high demands in the field, the loader wagon professionals have upgraded the Europrofi with another optimisation: the new front panel for even more operating convenience and flexibility.

Thanks to the optimised geometry of the front panel, the forage compression flap can now be better adjusted to the crop. The spring-loaded flap controls the automatic loading system. The sensor switches the scraper floor on and off, with a time delay if required. The 2,000mm wide forage compression flap ensures perfect filling of the loading chamber, right up to the edges. On the standard versions, two basic positions can be set manually. Infinitely variable hydraulic adjustment of the inclination is also available as an option. This also allows the flap to be fully retracted, so that the top section of the loading chamber can be opened when the loader wagon is deployed in harvest transport mode. Roof

ropes, which are available as an option, can easily be removed.

For maximum conservation of the forage, an optional sensor is available to monitor the loading torque on the rotor. This is particularly important with a wet, heavy crop, which makes it more difficult for the material package to reach the forage compression flap. In this situation, the automatic loading system and the scraper floor are controlled based on the torque of the loading rotor. This configuration enables the wagon to be filled while maintaining the best possible forage structure even in the most difficult conditions.

The appropriate loading strategy can be selected from the driver's cab to match the current task.

Pöttinger successfully combines tried and tested systems (such as the Powercut chopping system, the patented Easymove swing-out knife bank, the proven 6 row floating pick-up and a supporting tracking roller) with new technology to deliver the best quality forage.

Due to their cost effectiveness, these high performance Europrofi Combiline multi-purpose rotor loader wagons are just as much in demand by farmers as they are by machinery rings and contractors.

100TH JAGUAR TERRA TRAC FORAGE HARVESTER

Although only a little more than three years have passed since CLAAS began manufacturing the Jaguar Terra Trac, the company is already celebrating the production of the 100th model. The landmark machine rolled off the line in Harsewinkel on 4 February.

The end of 2018 saw CLAAS implement the successful Terra Trac crawler track technology in the Jaguar forage harvester. Optimised for the requirements of this machine segment with special features such as the headland protection system, the Jaguar Terra Trac made it possible for the range of applications of a forage harvester

equipped with crawler tracks – which reduce both soil compaction and rut formation – to be extended to grassland harvesting for the first time, thereby enabling optimal protection of the grass cover. "Helmut Claas himself was behind the initiative to develop the Terra Trac crawler track units for a wide range of forage harvester applications", recalls Dominik Grothe, Senior Vice President Forage Harvester. "The aim was to offer our customers a machine that was not only able to deliver high traction and reduced soil compaction for maize harvesting in difficult field conditions, but could also be used for grassland harvesting as effectively

as a traditional wheeled machine. It's interesting to note that the positive side-effects, such as smooth running characteristics and resistance to drifting on side slopes, are regarded by many farmers and contractors as equally decisive factors."

Farmers and tractor enthusiasts had the opportunity to find out how well their machines performed, at a Charity Dyno Day organised by AGCO main dealer R W Crawford.

The event, at the dealer's Charing depot in early February, was attended by more than 200 people. Funds were raised for the Guts UK charity which invests in research into diseases of the human digestive system.

Tractor owners were invited to bring all makes and models of any age to be tested on three dynamometers from the Crawfords Kent, Essex and Sussex depots. The cost was £20 per tractor and technicians from each location were on hand to explain the testing process and interpret the results.

Classics tested included a Ford 7810 (84hp); a Ford TW35 (154hp); and two Case 1056XL tractors (90 and 94hp). Top results were from a Fendt 939 (RWC Machine) (357hp); closely followed by a John Deere 8345R (328hp). Lowest hp winner: Jim Aikeman, Ford 6410 (67hp). Highest hp winner: Iain Smith, John Deere 8345R (328hp).

The Crawfords team tested 30 tractors during the day, but there was also an excellent display of 15 older machines brought to the event by enthusiasts and local vintage tractor club members who each donated £15. An immaculate John Deere 8430 owned by Nick Schatunowski won the 'Best turned-out vintage

tractor', award.

Massey Ferguson 135 owner Liam Smith attended the event; "It was the first outing for my MF 135 so the day was quite special for me. I particularly enjoyed seeing the six classic Ford tractors, and how some of them performed on the dynamometer. The TW35 was my favourite – mainly because it's a tractor I would love to own myself."

"Excellent weather contributed to the Dyno Day's success and a total of £2,000 was raised for the charity," commented Crawfords' Marketing Manager Hannah Kelsey. "The day was enjoyed by everyone,

and I know that our workshop teams got a lot of satisfaction out of explaining how they use their state-of-the-art dynamometers to check power outputs and diagnose issues, as well as giving hints and tips on how to improve each tractor's efficiency and performance."

"We have wanted to put on an event like this for a while; bring everyone together and give something back to the local community and a charity close to our hearts. I am overwhelmed by the generosity and support from everyone. We will look to make this an annual event," said Crawfords' Kent Product Demonstrator, Ben Marsh

A NEW GENERATION

Introducing the first of the company's next generation mini-excavator range with a new shared global styling, the DX50Z-7 5.4 tonne and DX55R-7 5.7 tonne Stage V compliant models have been launched by Doosan Infracore Europe. The zero tail swing and reduced radius design of the DX50Z-7 and DX55R-7, respectively, make them ideal for work in confined spaces on construction, landscaping and utility projects.

Both models are powered by the Doosan D18 Stage V compliant diesel engine providing 36.4 kW (48.8hp) of power at 2200 rpm. As a result, the DX50Z-7 and DX55R-7 offer the highest power and torque in their class.

These machines also offer a high auxiliary flow of 80 l/min to enhance work with attachments. Newly designed cast counterweights ensure excellent machine balance and stability when working. An additional 200kg bolt-mounted counterweight option is available for the DX55R-7.

The new DX50Z-7 and DX55R-7 mini-excavators are packed with a host of innovative features. Nowhere is this more evident than in the new high comfort cab, which has a full glass entry door to maximise operator visibility on this side of the machine from inside the cab. The high luminance LED work lamps on the cab further enhance visibility.

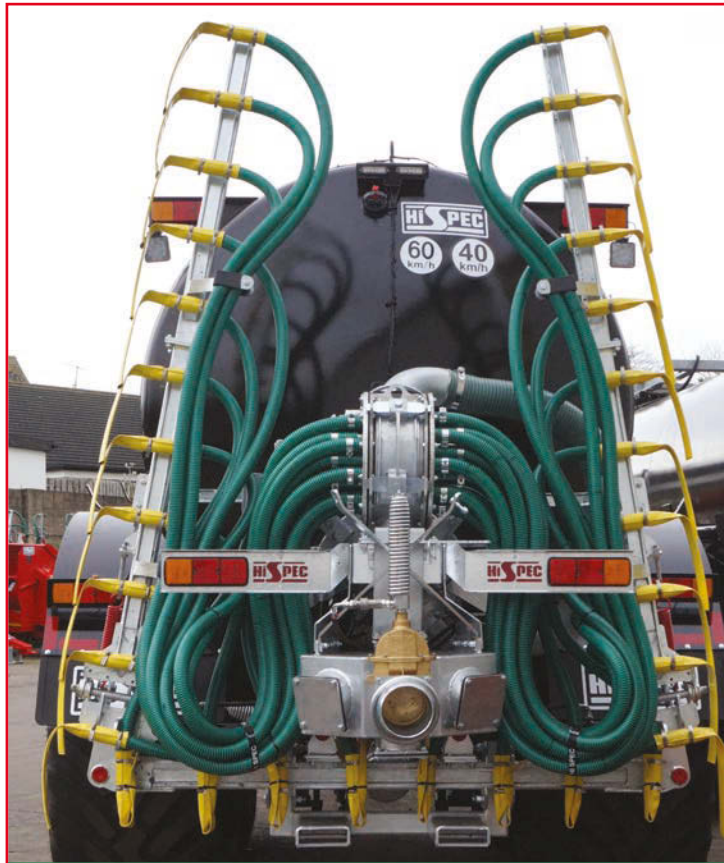

The enhanced HVAC system is the best on the market, providing more nozzles to direct warming and cooling air, including both front and rear pillar nozzles that together help to improve the system performance. Larger nozzles are also used to ensure direct and sufficient airflow for operators and manual adjustment of the opening/closing of the nozzles is also possible.

The DX50Z-7 and DX55R-7 mini-excavators incorporate a new dozer blade providing both a higher dozer lifting height and dozer digging depth than other machines on the market. The machines also have a new dozer blade control lever.

Using the dozer lever, the operator can select between low and high speed for the levelling blade hydraulics. Travel speed can also be selected by using the travel selector button on the dozer lever. When hydraulic oil pressure rises due to going up a slope while driving in the high speed mode, the travel speed auto-shift valve automatically resets the travel speed to low, to enhance the operator's driving convenience and to reduce machine stress.

The dozer control also provides a new blade floating function – pushing the dozer lever all the way forward puts the lever into the detent position and leaves the dozer blade in a 'float' position. Customers can also choose the optional dozer lock function, which prevents dozer blade creep.

The boom swing angle and swing radius are better than or equal to other machines in this class. Visibility and workability are improved by increasing the bucket protrusion distance beyond the tracks. Placing the boom swing cylinder on the left hand side of cab allows the operator to work right up against walls and other structures on the right hand side of the machines.

NEW DRIBBLE BAR ENSURES ACCURATE SLURRY PLACEMENT

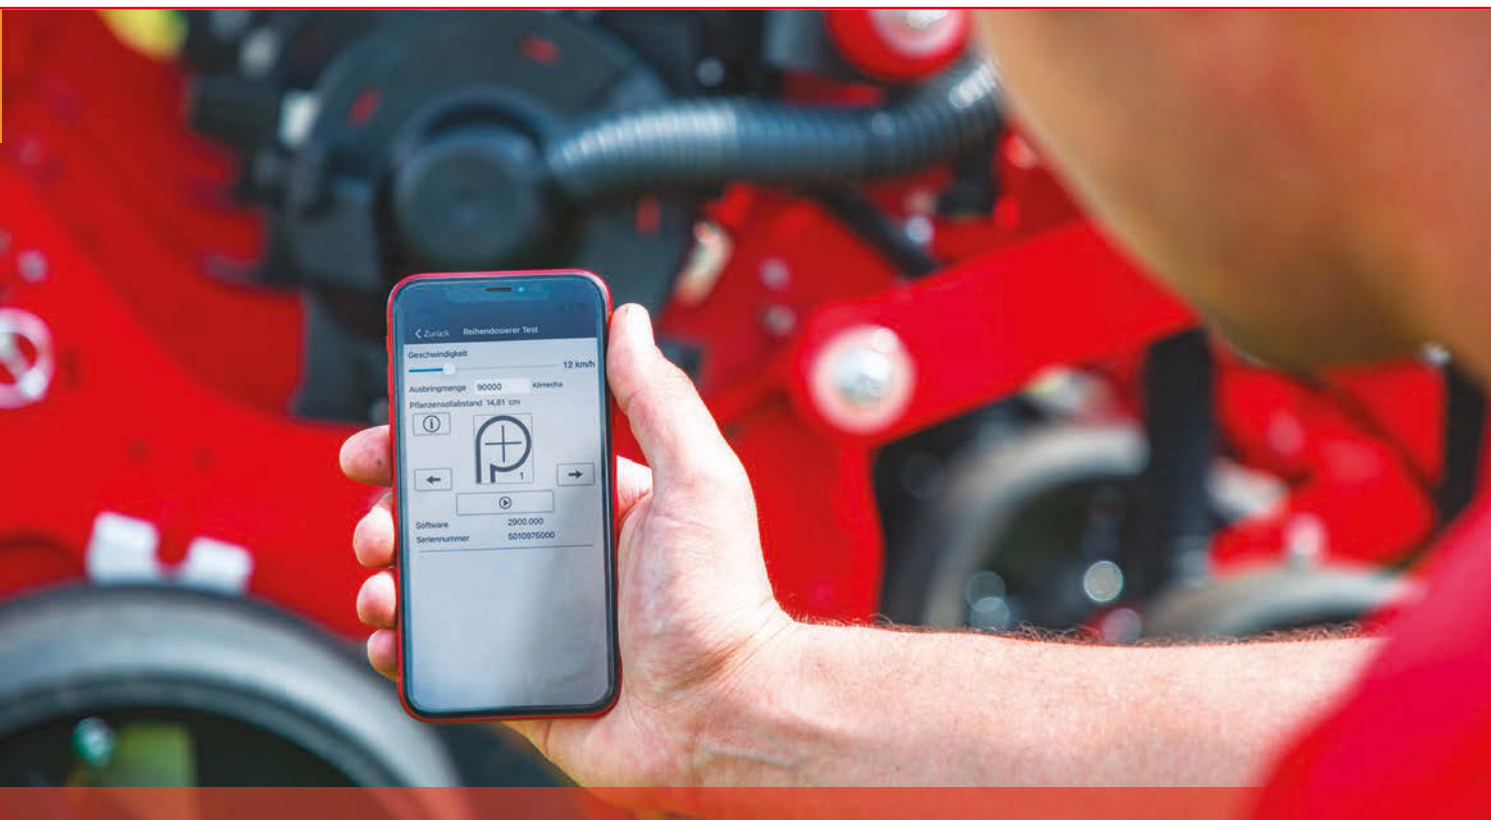

Hi-Spec Engineering has extended its range of slurry application equipment with the introduction of a new chassis mounted Dribble Bar. This comes at a time when the value of slurry as a source of nitrogen and other nutrients has been brought sharply into focus following the recent hike in price for compound fertilisers.

However, if the maximum benefit is to be gained from the use of slurry, care needs to be taken as to how it is applied. By placing the slurry on the ground, dribble bars and other forms of low emission slurry spreading, firstly reduce the risk of run-off but also minimise the amount of nitrogen lost into the air in the form of ammonia.

The new Hi-Spec Dribble Bar has a working width of 7.5 metres, and folds down to just 2.55m for transport. It features 30 flat hose outlets, 25cm apart. Feed to each of the outlets is via a Hi-Spec distributor with an integrated stone trap.

The Dribble Bar frame is fully galvanised and is fitted with an LED lighting bar for safe travel on the road between farm and field. Each of the arms incorporate a sprung breakback mechanism to prevent any damage to the arm in the event of a collision. Weighing just 520kgs, the Dribble Bar is chassis mounted, which has the benefit of spreading the weight closer to the tanker axle and avoids any stress on the tanker barrel or the rear door.

The design includes a splash plate with a 6 inch feed and two blanked off 6 inch filling points for optimum functionality. The Dribble Bar only requires a single double-acting spool valve and is operated using a diverter control to switch between lifting/lowering the arms and operating the distributor and gate valve.

DIGITAL INTELLIGENCE FOR FARMING

39

HorschConnect is a new product family from HORSCH that aims to make the exchange of data between machine and customer as efficient as possible, as well as to link customer, dealer and HORSCH in a better way. Whether locating the current position of the machine in the field or controlling a seed drill with an app, this can be carried out with HorschConnect.

HorschConnect focuses on the benefits of connectivity and digitalisation. It includes the increasing digitalisation of HORSCH machines, using apps like the MobileControl app to control the machine via a smartphone or the HorschConnect Telematics Portal to record telemetry data. HorschConnect optimises the flow of information to ensure customers are better informed.

Using HorschConnect, a farmer can see machine information, such as operational speed or the application rate, in a user-friendly format. Instructions can be sent to the machine to optimise working processes and increase efficiency. Remote diagnostics of machine information and error messages allow for a proactive and targeted service.

The MobileControl app allows the comfort and convenience of controlling the machine via a smartphone and is designed to make work easier.

For example, a machine can be calibrated quickly and intuitively via the app and all the product information is available at hand.

Using an integrated WLAN and GPS modem, the SmartCan hardware solution connects the machine to the internet or a smartphone. An integrated memory card guarantees an additional data back-up if there is no mobile network coverage.

HorschConnect is available across the full HORSCH seed drill and sprayer ranges and will be compatible with other external systems in the future. HORSCH is not creating an isolated solution but will focus on compatibility and connectivity to other control systems and telemetry. This will create a significant step forward in digitalisation, automation and improved productivity.

NEW VERSION OF DIGITAL APP

40

Ag-drive, the new digital app helping agricultural contractors and farmers to manage their business more effectively, is now even easier to use thanks to the release of significant updates to the desktop dashboard and app, made in response to user feedback.

Launched in summer 2021 and developed by farmer and contractor Will Dunn and his father, Ag-drive replaces time-consuming paperwork with digital timesheets, field mapping, job recording for teams of any size, health and safety checks, and integrations with common accounting software for easy invoicing.

"Getting feedback from our users was incredibly important for us to continue the development of Ag-drive. We knew that there were parts of the app that could work better, but we needed to hear from our customers to ensure we made the right changes to meet the needs of their businesses," says Will Dunn, founder of Ag-drive.

"The most significant change we've made is to remove the need for users to enter their credit card details to start a 14-day trial of Ag-drive. This makes it really easy for contractors and farm businesses to see for themselves how much time they could save by switching to a digital system before committing themselves."

The screens on desktop and app versions have been re-designed to make Ag-drive simpler and faster to use, and bulk actions can now be processed, saving even more time.

Other changes have made it easier to manage customer information and invoicing. Users can now add customers without having to specify a customer email address and the platform supports bulk imports of customer data to save time when setting up accounts.

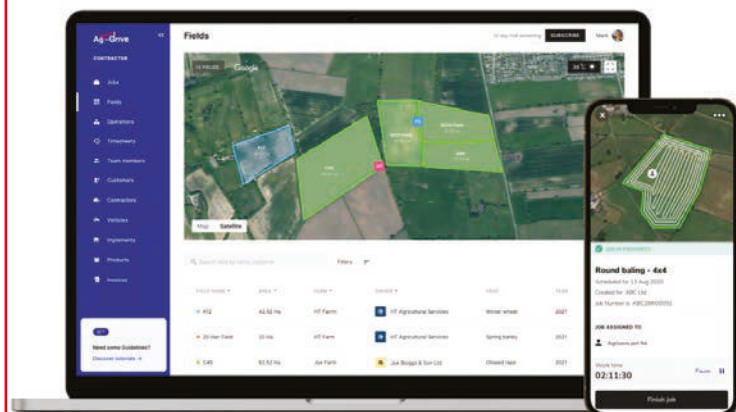

"As contractors and farmers, we knew there was a better way than operators manually completing timesheets, and then trawling through paperwork to send invoices out to customers. With Ag-drive we're taking the pain and hassle away from running a busy contracting or farming business, by putting everything on your phone, on a cloud based system," explains Will.

All actions can be done on the Ag-drive app, although the desktop version is mainly used for invoicing and processing time/job sheet information. The platform connects seamlessly with accounting software QuickBooks and Xero for simplified invoicing and record keeping, ensuring customers know exactly what work has been completed and when. Each job sheet can be attached to the invoice for complete transparency. Integration with Sage accounting will be enabled soon.

Ag-drive's ambitions aren't contained to just contracting and farming businesses in the UK.

"When you sign up to Ag-drive your currency and tax rates are now set according to the country you choose, which means Ag-drive can be used by farm businesses around the world!" says Will.

After the free trial period expires, users can choose one of four pricing plans depending on the size of their team. Plans start from £10 per month.

SPEARHEAD GROWS GEARBOX WARRANTY

Confident of its tough build, the European market leader in flex wing rotary mowers has enhanced its gearbox warranty across the entire Multicut range. Every model – from the 160 to 820 – now incorporates a more powerful 165hp gearbox system with an industry leading seven-year warranty.

First launched by Spearhead Machinery in 2019 on key models (with a five-year warranty), the Multicut's premium gearbox demonstrated its performance followed by endless positive feedback. With proven results and a brand-wide roll-out, the new longer warranty period adds further quality assurance to the

ever-popular mower range.

"Our strong 165hp gearbox has worked hard for many customers during the last two years. Designed with challenging terrain in mind it's the best Multicut gearbox ever. Our rotary mowers are relentless. And now they all have a seven-year warrantied gearbox that performs in all conditions providing further peace of mind for our loyal customers," said Neil Warren, Spearhead Chief Design Engineer.

Delivering up to 30% more power than competitive gearboxes, the 165hp version also has oversized shafts and gears. This improves performance in the toughest of terrains.

"We're committed to building the very best quality machinery. We remain proud of our talented British engineering team and with a manufacturing heritage in-house, bolstered by valuable customer feedback, we work towards a continuing cycle of listening and improving," said Neil.

MORE ACCURACY AND EFFICIENCY

Advances in Kverneland disc spreader technology have seen the introduction of several new developments.

The first is an integrated hydraulic driveline called intelligent Disc Control (iDC). Currently available only for the Exacta TL Geospread model, the iDC version uses two individually controlled hydraulic motors – one to power each disc. This sophisticated driveline enables independent disc speed regulation on left and right-hand discs, opening up a range of possibilities for even greater application accuracy.

With headlands accounting for up to 54% of a field's total area – the smaller the field, the greater the headland percentage – there is a requirement for enhanced spread pattern control during border spreading. And it's not just on the headland side, but also in-field when border spreading where the full spread pattern has to be maintained.

Using a tractor's Power Beyond capability, iDC is able to deliver a more consistent disc speed, which is maintained through disc speed monitoring. Without the constraints of a fixed pto speed to operate a mechanical pto driveline,

tractor fuel efficiency gains are possible as a result of using much lower engine revs when spreading. The iDC spreader is for rear linkage use only, and is priced from £28,849.

Additional capability has been introduced to Kverneland's weigh cell-equipped Exacta models, enabling the CL Geospread, TL Geospread and TLX Geospread to now be used in front-mounted and rear-mounted disc spreader combination.

Thanks to advanced software, the weigh-cell spreader's location as a front-mounted implement is now easily set and conveniently managed through any universal terminal. This flexibility can create payloads of up to 7,000 litres from combining front and rear-hopper capacities, and also offers the ability to make two separate applications with different fertiliser products, in one pass.

Should the tractor lack a front pto, the CL Geospread, TL Geospread and TLX Geospread can also be equipped with an optional central hydraulic driveline to replace the pto shaft. In addition, the ExactLine border spreading device can be specified for mounting on the left-hand or right-hand side of the spreader, so both machines can manage their border spreading on the same side.

SECOND LARGEST ATTENDANCE IN HISTORY

After a gap last year, this very popular annual event was back again at the Ernest Doe headquarters in Essex, running from 1 to 3 February *reports Richard Shepherd-Barron.*

> 1931 Case Model C

Claimed to be the UK's largest agricultural, construction and groundcare machinery event, Graham Parker, Ernest Doe Sales Director, said: "With an attendance of well over 10,000, this year's show was the second largest in our history, being beaten only by our golden jubilee show 12 years ago."

The show was not being treated just as a day out to look at 'big boys' toys', but real business was being transacted, with visitors, not just locally but from most English counties as well as Wales and Scotland, having serious purposes in mind.

150 suppliers took the opportunity to exhibit their equipment and services. From the huge range of Case IH and New Holland tractors and combines through to small grass cutting machinery, there was something of appeal for everyone.

> Star of the classic era

> Hyundai HX85A compact

> How to plough!

Apart from the many tractors there was every conceivable piece of equipment to attach to them – ploughs, cultivators, drills, rolls, harrows, fertiliser spreaders, balers, grassland and groundcare machinery, hedge cutters and trailers. In addition, there were very many small trade displays of farm equipment and services, while Doe's permanent showroom featured garden machinery, tools and spare parts as well as a vast range of practical and fashionable countryside clothing for men and women.

From an environmental point of view, the first showing of the new T6.180 from New Holland, which is the world's first 100% methane powered production tractor, was the show stopper.

This was attracting a great deal of interest, as farmers with the right infrastructure can generate their own biomethane from anaerobic digestion plants using agricultural, horticultural or animal waste – or even growing energy crops such as maize – to power the tractor.

Gas may also be obtained from the gas grid network or at specific biomethane stations. Currently there is a price premium for this machine, but it most certainly does demonstrate the way ahead to help with environmental problems and as an alternative to fossil fuel.

In conjunction with Cheffins, there was a timed online auction for the 600 lots on display. There were no buyers' fees. The winning bid was what was paid, and Doe offered free delivery within their trading area for all items over £2,500.

Graham Parker commented: "64% of the lots were sold and there have been a large number of post-auction sales as people realised the huge increases in the prices of new equipment. The slowdown in new tractor registrations in the UK last year has continued into the New Year and has sparked interest in good used machines.

"We're delighted with our collaboration with Cheffins, and this has been very successful for us both."

Part of the attraction of the Doe Show is the machines being demonstrated and Doe had New Holland and Case IH tractors demonstrating New Holland, Lemken and Bednar ploughs, cultivator and mower.

No Doe Show would be complete without the very popular display of vintage and classic tractors. This included a 1925 Fordson Model F, a 1931 Case Model C, a 1959 Fordson Dexta, a 1970 Ford 5000 and a 1974 Ford Force 500. Of course, as the star of the show, the 1961 Doe Triple D! All machines were busy, with their drivers showing huge skill with perfect straight lines across the land – to the amazement of many of the younger visitors who only know GPS positioning.

> Fully equipped Case IH

SECURITY PACKAGE FOR GPS EQUIPMENT

Vantage ASC has seen GPS thefts increasing with the number of customers purchasing equipment linked with insurance claims. Due to their frustration and concerns with the risk, Vantage ASC have proactively looked (and continue to look) into solutions which can deter theft. Replacing stolen equipment is not good business; priority is retaining technology on farms and protecting customers assets.

To date Vantage ASC have the following solutions categorised under the security package:

RECEIVER TRACKING

New as of February, this is a service Vantage ASC provide to customers which costs £252. This includes the reconfiguring of the receiver, activation and two years monitoring by Vantage ASC. Should a theft take place, the customer notifies the company, and the equipment's location is accessed.

SMARTWATER FORENSIC MARKING

Vantage ASC offer a SmartWater Forensic Marking option for displays/receivers/ ECUs which costs £70.

RECEIVER QUICK RELEASE BRACKETS

Vantage ASC can provide brackets for Trimble receivers from £173. This allows customers to remove them from the machine without any tools. The brackets allow insertion of the receiver which is then secured with a lock back clasp making it tool free, the lock back clasp also has a hole for padlock if required.

DISPLAY QUICK RELEASE BRACKETS

Vantage ASC offer RAM Mount products which are industry known, these can be specified for numerous locations in a vehicle and allow the simple removal of equipment from machine cabs. Pricing is dependent on fixing requirements.

CLOUD BASED STORAGE AND AUTOSYNC

Taking advantage of Trimble cloud software Vantage ASC can provide automated data backup of display data including field A-B lines, boundaries, farm and field names, application information and task data. To do this the machine is equipped with a modem for WIFI (hardware £512) and then connected to the cloud software which is £298/year for the whole platform and the connection. Sim cards for the modem can be supplied or the customer can use their preferred network.

Whilst there are no official reductions in insurance premiums as yet, insurers are actively encouraging the options as it mitigates the risk.

UNIQUE BUSINESS OPPORTUNITY WITH KENT GRITTING

Tom Swayne of Kent Gritting has built an extremely profitable winter maintenance business which has successfully grown over the past decade. His commitment to the company, which has been nurtured from the start, has recently seen the business evolve into a Nationwide Facilities enterprise, which includes a progressive Nationwide Gritting brand at the forefront of its growth. As such, Tom needs to devote more time to his national organisation and is therefore seeking a purchaser, or partner, to take the reins of Kent Gritting and to continue its successful operation throughout the South East of England.

Coming from a farming background, Tom set up Kent Gritting to complement his already existing equestrian and farm contracting businesses, which

were operated seasonally throughout the spring, summer and autumn. "The winter maintenance operation filled the gap throughout the winter months," commented Tom "and soon became very lucrative," he added.

With high level contracts already in place, the new owner will inherit an existing and expansive portfolio of work, largely provided by Tom's Nationwide business. "Further to this, extra income will be generated from other commercial enterprises," he added, "where excellent long-standing relationships and revenue streams have been well formed over the years."

Across the network of existing clients, numerous contracts have been secured on a fixed price basis, meaning even on a mild year income is guaranteed. The ready-made client database

includes some impressive names such as the NHS, Aldi and supermarket giant Asda, to name but a few. With an aggressive growth strategy, Nationwide Facilities Ltd will only be adding to the list of big names. "We will continue to secure further contracts with other leading brands, which will safeguard the future income for both Kent and Nationwide Gritting," Tom explained.

To enable this level of expansion, working alongside Tom in the Nationwide team are Winter Maintenance Director Louise Hindle, recently recruited from national competitor 'Gritting.com'. Joe Allan-Nagy, Head of Operations and BDM who also moved from a national competitor 'De-Ice' four years ago. Katie Milldown, (previously Sales Director at Savills) heads up the sales division and is currently recruiting a new sales executive for

further business development.

In addition to gritting, Nationwide Facilities Ltd is setting out to provide further service lines to its existing and prospective clients as part of its long-term growth. The successful purchaser of Kent Gritting will also have the option to deliver these services if they wish, providing continuity of revenue throughout the calendar year.

"This is a golden opportunity for someone to benefit from an already profitable revenue stream, throughout the winter months and beyond," Tom added.

The equipment, which is also included in the acquisition, is predominantly made up of British built Vale machinery. The fleet is extremely robust, reliable, owned outright and mostly aged within three years old. "We have always taken great pride in operating the very best equipment and keeping it well maintained, which is vital for reliability when carrying out gritting and snow clearance services for our clients," Tom explained.

"I appreciate there's a lot of talk about global warming, but what we really have is climate change, not warming," Tom admitted. "We still have regular cold spells, such as the one we experienced in January.

"It wasn't so long ago we had 'The Beast from the East', and last year we saw lower than average temperatures with gritting work extending until the end of April. Clearly some winters are harder than others, but extreme weather will continue to happen and will continue to bring opportunities.

"The opportunity is there; it just needs the right person to take the opportunity. And whilst we all know that British winters are unpredictable, income from Kent Gritting certainly isn't." Tom concluded.

For an initial and informal conversation regarding this opportunity, please call Tom Swayne directly on 07775 774440

KEY ADVANTAGES OF ACQUIRING KENT GRITTING:

- Well known and established for over 10 years
- Guaranteed Income
- Utilises farm machinery, vehicles, and staff throughout the winter months
- Guaranteed partnership with Nationwide Gritting
- Long standing client relationships
- Additional income stream from other organisations
- Secured and existing contracts already in place
- Opportunities for additional service lines
- Continuity of work in historically quieter months
- Up to date fleet of well-maintained machinery
- A good source of revenue and

Peter Love, the joint creator of Tractor & Machinery and Classic Tractor, gives Farm Machinery his views on this month's events.

If you have a story, or an event, please do get in touch: peterlove@madasafish.com, TEL: 01323 833125

This month we look at the Somerset Vintage Tractor Show that took place at the end of January and preview a number of stunning sales coming up, even one in Northern Ireland.

Firstly it is with sadness I note that Ron Knight MBE, Derek Mellor and Brian Chester all passed away in January and I send sincere condolences to

their families. Ron Knight MBE and Derek Mellor were gigantic tractor, combine and steam restorers over many decades, which they did until it was physically impossible for them to get out in the workshop. Brian Chester was a farmer and keen preservationist, besides president of The National Vintage Tractor & Engine Club. An appreciation of all three men will appear in the next issue.

AIDAN STRAIN COLLECTION

On Saturday 2 April Cheffins head to Newry, Northern Ireland for the amazing Aidan Strain Collection sale. They are to sell over 80 grade 5.5 restored tractors, plus implements, commercials and cars. Originally it was scheduled to happen in the summer of 2020, but was cancelled owing to Covid-19, so the sale is eagerly awaited.

The sale includes: Ferguson Brown Type A, Doe Triple- D, Massey Ferguson 1200, Roadless 118, 115, County; 654, Super-4, Super-6, 7600-Four, Ford;

7000, 5000, 4000, 4000 cutaway (ex Kent), 3000, 2000, Massey Ferguson; 188, 165, 148, 145, 135 4wd, 135 (2), 135 ind, 130, 65 MKI and MKII, 35X, 35X Multi-Power and FE-35 grey/gold. IHC; BWD-6 634, 624, B614, 523 4wd, 523, 475, B-450 Roadless, B450, 434 (2), B414 (2), 276, B275 4wd, B275 Hi-Clear, B275 (2), B250 (2). Ferguson TE-F20 (2), David Brown; 50D, 1212, 990, 880, 780, 770 (2) 25D Cropmaster, Nuffield 4/65 (2), 460, 10/60 and 342. Fordson E1A Major (2), Power Major, Super Dexta, Dexta, Leyland 262, 154 and Ford-Ferguson 2N.

46

The Ford, Nuffield and David Brown tractors are nothing but spectacular

The 'grey' fleet is very much a stunner

As can be seen the Ford 7000 has the correct cab and looks the part

What a superb Massey Ferguson 135 four-wheel drive with Sekura cab

The IHC line-up is just amazing, nothing but glamour

The Ferguson Brown A is another gem

LOVE BROTHERS

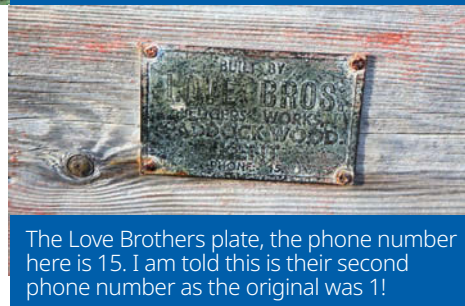

The trailer even tips, but is past its prime at the moment

Some well known friends invited me in early January to inspect something I had forgotten that they had. My family were agricultural, car and commercial body builders at Ledgers, Paddock Wood, Kent, from the late 1880s until 1956 when the three brothers involved retired.

Besides making horse drawn farm wagons and carts in the early days they went on to make the bodywork for Canterbury's first motorised fire engine and bodies for Ford Model Ts, some of which were used in their taxi and coach business as well. The lorry bodies were for: Leyland, AEC, Albion, International, Bedford and the (locally made at Maidstone), Tillings Stevens beside Vulcan.

However they continued to make pneumatic tyred trailers in various sizes as their 'bread and butter' stock. The trailer I was looking at is a 30cwt tipper. The bodywork wants totally rebuilding, but

The Love Brothers plate, the phone number here is 15. I am told this is their second phone number as the original was 1!

I was impressed by the standard of welding which looked well up to the mark. It looks as though it could have worked for the Eridge estate as it came from that area and the Eridge estate was a very good customer of Love Bros.

I know there are a few of Love Bros trailers existing, but if you have one I would love you (sorry for the pun) to get in touch – Tel: 01323 833125 Email: peterlove@madasafish.com

Seen at the Kent County Show in 1953 is the Love Bros stand

EVENTS GUIDE

Please check that the event is going ahead before planning your day or travelling, particularly with the Covid-19 situation as it is. Some events advertised may not now be taking place, so do check first. In some cases you may have to book your ticket online in advance. Farm Machinery does not take any responsibility if any details are incorrect. Do remember to still take and wear a face mask and use hand sanitiser. If you have an upcoming event and would like it listed, please do send in your details, peterlove@madasafish.com – Tel: 01323 833125.

NO RESERVE BEN BLANFORD COLLECTION

On Saturday 26 March at Bosbury, Ledbury, Hereford farmer Ben Blanford is to auction his 40+ collection of clean original style Ferguson and Massey Ferguson agricultural and industrial tractors with H J Pugh.

Ferguson and Massey Ferguson tractors have been all that Ben has known all his life. His father Gerald came Bosbury with the family in 1981 from Eastnor, Herefordshire. The farm was operated with a Massey Ferguson 165 with loader that they brought with them and a grey Ferguson that was about all they needed.

The mixed farm was just 90 acres with a 40 cow herd as its major feature, today the herd has doubled and the farm has grown to 350 acres.

Today the local Massey Ferguson dealers are Ross Farm Machinery who do a good job Ben says. The three main tractors used today are a MF 7018, 5713 and a 5611 which have been supplemented by some of the classic fleet on high days.

All the extensive MF classic fleet run and look the ticket and it was a pleasure to see them out and about in late January. Ben said: "I have been collecting for over a decade it's time to move on to other things." He also has some lovely genuine historic classic plant, backhoe/loaders that are gems of British history in their own right; an area of our hobby that needs to be looked at more closely by collectors. Ben's examples are very, very clean and are all ready to go!

As we walked around I came across three Ferguson trailers two in excellent condition, including the superb ex John Moffett/Rackham

Wow! What a line of classics that will all come under the hammer on the 26 March along with the trailers

Collection example. The Ferguson implements include: rotavator, hammer mill, single and two and three-furrow ploughs, two sets of heavy discs, Kale cutter (rare), potato planter, fertilizer attachment, rowcrop thinner (rare), water pump, light discs, Irish potato spinner, seed harrows, steering hoe, winch, saw bench, butterfly plough, loader, 9-spring tine cultivator, scuffles, finger bar mower and sub-soiler and others. There are also Ferguson implement spares in the sale.

As for the MF implements: MF weight transfer, no.728 potato spinner, no.857 2-furrow plough, seed drill, cutter bar mower, no.765 3-furrow plough, no.10-8 baler, no.20-8 baler, multi-discs x 3, muckspreader, no.23 tine-cultivator, no.30 disc drill, no.28 mounted discs, no.86 5-furrow trailed plough, MF weights, no.70 drum mower, no.23 scuffles, no.97 seed drill, fertiliser spinner, harrows and 3 and 6.5 ton trailers (lovely).

There are some 216 lots in this sale there is no VAT or reserves on the entire classic and vintage collection, so you can have a good go at everything as there are no hidden extras. I look forward to seeing you all at the sale.

Ready to chop some wood up is the 135 with Flexi cab with McConnell saw bench on the backend

Ben's three children with the three original combines that all work well and two have log books

Two of the original 'clean' fleet with the MF590 and the very hard to find 592

The rare Weathershield cab on the Ferguson TE-F diesel that started so well in the wintery conditions

The very original 1974 MF 1250 artic which comes with a current log book and does not smoke either

The 575 goes about its business as it cleans out the cows with the very genuine MF trailer that is also in the sale

RECORD CROWDS AT SOMERSET VINTAGE SHOW

On 29-30 January, the Bath and West Showground hosted the season opener for all tractor enthusiasts when the Somerset Vintage Tractor Show rolled into town.

Now under the guidance of Margaret and Mike Marshall and their team this was to be the biggest they have staged, as people thronged through the gates as never before.

I was welcomed by the gate crew at 7.20am and it was straight into the Edmund Rack Hall where the shows major feature Massey Ferguson was seen. On the left, I was greeted by two-wheel drive gems in the form of the well restored 1979 MF 565 of T Wilcox and looking so sharp was G Day's 690 Multi-Power. Its Sankey cab looking like new as did the rest of the tractor.

To your right was the Friends of Ferguson Heritage stand with a well equipped and restored MF 65 Mk2 out front. At the top section of the hall The Ferguson Club had another fine stand with approximately 15 of their member's tractors around them. It was here that a 1965 Massey Ferguson 130 with finger mower stood out from the crowd. The restoration had been to concours standard; owned by L Hatcher.

We also saw B Moore's 9 May 1961 Massey Ferguson 35X one of 210 produced on the day-shift that day. It was purchased from north Wales in April 2020. Since then it has been given a full restoration and certainly looked the part. The mudguards, front grille, side panels, were replaced and the painting was carried out by West End Garages (Bruton) Ltd. The Moore brothers rebuilt the steering box and fitted a new wiring loom and lights, many of the parts

came from Noble Machinery.

Near the entrance to the hall was one of the few grey Fergusons, but after all the theme was Massey Ferguson. It took the form of a 1953 TE-E (narrow) no. 353973, which owner Adam Branfield from Wiveliscombe, Somerset purchased from Fivehead, Somerset. Over the Covid-19 lockdowns the restoration was carried out in an original style. On the backend was a Ferguson W-UE-20 winch that the owner bought in December 2014.

Another original style tractor in this area was Michael Cooper's 1976 165 that he bought in 2016 and even today six years later is still in daily use, where it looks after 250+ sheep and 26 cows. The 165s other duties are topping and water carting, so it gets plenty of use and like quite a few here was driven to the show.

Keen as mustard is the Troutt family who even used their venerable fleet for family weddings. On display was the 1974 MF 185 eight-speed with its Farmhand F11 loader right up in the air. The tractor was purchased from Fishguard, Pembrokeshire, but with no history unfortunately. (Can you help?)

It carried of course the 75hp Perkins 248 engine that was also in the 188, in fact some 21,333 were made whereas the 185 saw 40,096. It proves perhaps that the 185 is another underrated tractor in the 100

series line.

Going up in horse power range was the 1970 MF 1150. The Detroit made tractor was imported back to the UK by Richard Keel Tractors and was added to the Troutt collection in 2011 previously having been stored from the mid- 1990s across the pond. The family carried out various repairs to make it tip top including the Perkins V8 146hp engine's injectors. It was standing beside their slightly smaller 1130 with the Perkins straight-six AT6.354 134hp engine also assembled in Detroit.

Moving up in years the Troutt's had their 1995 Massey Ferguson 399 four-wheel drive, which they have owned from new. It's done 10,450 hours. The tractor is still used yearly for ploughing with a four-furrow Kverneland and a fertiliser spreader on 150 acres of wheat. But that's not all as it's seen with a Knight 21m 1200L, spraying 1,000 acres.

Over on the other side of the show and placed outside was a great line of commercially used tractors including a number of Valtra's that are becoming more popular as time goes on. Here we saw: 8450, 8350, and 6506 Felicia. Bringing us right up-to-date was a multi-coloured T1234. Also seen was a number of John Deere's including: 6580, 7920 and 7930. This section was finished off with classic Fords, New Hollands and Fendt four-wheel drives.

During the Sunday morning awards ceremony Steve Thornell took the top award with his David Brown 1690 four-wheel drive and 'Best In Show' went to Trevor Fowler's very fine early International B250 placed also in the main building.

An amazing £11,000 was given away to local charities: Dorset & Somerset Air Ambulance; £3,000, Brainwave; £2,000, Mind; £2,000, Hotrock Carnival Club; £1,500, Sandys Carnival Club; £500 and Somerset & Dorset Animal Welfare; £2,000.

Congratulations to the organisers and exhibitors who took part, it was a great place to be and the weather certainly helped! Next year the major feature will be John Deere.

Three artic gems with Colin Claude's 1978 1200 on the left and on the right is R Targett's 1975 MF1505

What looked to be the top tractor at the show in my eyes anyway was the just restored David Brown 1690 four-wheel drive of Steve Thornell

T Fowler's 1963 International Cadet 70 looks the part and is the number one make on the American extensive horticultural scene

Possibly the most original tractor at the show was Martin Richard's ex Everly Farms, Blandford 1981 MB-Trac 800 that's just on its second owner now

Wrights Broker Service

The safe and reliable way to buy and sell machinery and equipment

Wrights Farming Register offers farmers and contractors a unique service through its team of brokers. They are the 'men in the middle' who give an impartial opinion on the items of machinery they handle on behalf of their clients. The brokers, who currently cover an area stretching from the Scottish borders to the South Coast, can save farmers time and money when it comes to buying or selling anything from a combine harvester to a cattle trough. In these security-conscious days, they also provide a discreet alternative to a public farm dispersal sale and can help farmers avoid the tax pitfalls these can cause.

HOW TO SPOT A SCAM ADVERT

CAUTION

We are currently aware of a number of fraudulent advertisers attempting to sell items within this section. While we aim to protect our readers by removing these adverts, sometimes they may unfortunately appear. Please be mindful before entering into any deals and **PROCEED WITH CAUTION.**

1. SPEAK TO THE FARMER

Always look into whether an advertiser appears legitimate.

2. VIEW THE ITEM

If you can, view the item on the farm first.

3. AVOID ERRORS

Avoid anything with errors. If an ad has odd formatting, strange or poor-quality images, or spelling/grammar mistakes.

5. NEVER PAY IN ADVANCE

Avoid sellers who claim to be unavailable (e.g. they are travelling or have moved overseas) and insist on payment prior to arranging delivery.

6. PAYMENT

Avoid any arrangement that asks for payment via money order, wire transfer, international funds transfer, pre-loaded card or electronic currency, like Bitcoin. It is rare to recover money sent this way.

Farm Machinery is NOT responsible for any part of the transaction that takes place with the seller and the buyer.

HOW TO SPOT A SCAM ADVERT

CAUTION

We are currently aware of a number of fraudulent advertisers attempting to sell items within this section. While we aim to protect our readers by removing these adverts, sometimes they may unfortunately appear. Please be mindful before entering into any deals and **PROCEED WITH CAUTION.**

1. SPEAK TO THE FARMER
Always look into whether an advertiser appears legitimate.

2. VIEW THE ITEM
If you can, view the item on the farm first.

3. AVOID ERRORS
Avoid anything with errors. If an ad has odd formatting, strange or poor-quality images, or spelling/grammar mistakes.

5. NEVER PAY IN ADVANCE
Avoid sellers who claim to be unavailable (e.g. they are travelling or have moved overseas) and insist on payment prior to arranging delivery.

6. PAYMENT
Avoid any arrangement that asks for payment via money order, wire transfer, international funds transfer, pre-loaded card or electronic currency, like Bitcoin. It is rare to recover money sent this way.

Farm Machinery is NOT responsible for any part of the transaction that takes place with the seller and the buyer.
